## OBJECTIVE

---

Software Engineer intern seeking to program in JavaScript, Express.js, Node.js and Vue.js .

## EDUCATION

---

<b>BSc Software Engineering</b> , Manchester Metropolitan University	2022 - Present
<b>First year in Chemical Engineering</b> , University of Manchester	2021-2022
<b>Foundation Degree in Sciences and Engineering</b> , Into Manchester	2020-2021
<b>Baccalaureate</b> , Joss Government High School	2018-2019

## PROJECTS

---

**Chirrup Social Media Platform.** Developed the "Chirrup" social media platform utilizing Node.js with Express.js framework for the backend, SQLite for database management, and Vue.js for the frontend. Conducted comprehensive endpoint testing using Postman to ensure functionality and reliability. This project's description spans two lines and received positive feedback from users for its seamless functionality.

**Point of Sale Full-Stack Development.** Developed a point of sale software with six other developers as part of university coursework for the Thematic Project modules. Utilized Firebase, a cloud-based database, for efficient data management, alongside Vue.js for dynamic frontend development. This project showcases proficiency in full-stack development, integrating cloud-based database solutions with frontend user interface design, and highlights effective team collaboration using the Kanban Agile methodology.

## EXPERIENCES

---

<b>Course Representative</b> Manchester Metropolitan University	Sep 2024 - Present <i>Manchester, United Kingdom</i>
--	---

- Collected and analyzed student feedback, identifying course strengths and areas for improvement.
